Table of Contents

Safety Information

Your BYTEM product is designed and tested to meet the latest standards of safety for information technology equipment. However, to ensure your safety, it is important that you read the following safety instructions

Setting up your system

- Read and follow all instructions in the documentation before you operate your system.
- Do not use this product near water.
- Set up the system on a stable surface. Do not secure the system on any unstable plane.
- Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
- Slots and openings on the chassis are for ventilation. Do not block or cover these openings. Make sure you leave plenty of space around the system for ventilation. ***Never insert objects of any kind into the ventilation openings***.
- This system should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
- Use this product in environments with ambient temperatures between 0˚C and 50˚C.
- If you use an extension cord, make sure that the total ampere rating of the devices plugged into the extension cord does not exceed its ampere rating.
- DO NOT LEAVE THIS EQUIPMENT IN AN ENVIRONMENT WHERE THE STORAGE TEMPERATURE MAY GO BELOW -20° C OR ABOVE 60° C. THIS COULD DAMAGE THE EQUIPMENT. THE EQUIPMENT SHOULD BE IN A CONTROLLED ENVIRONMENT.

Copyright © 2013 IBASE Technology Inc. All Rights Reserved.

Care during use

- Do not walk on the power cord or allow anything to rest on it.
- Do not spill water or any other liquids on your system.
- When the system is turned off, a small amount of electrical current still flows. Always unplug all power, and network cables from the power outlets before cleaning the system.
- If you encounter the following technical problems with the product, unplug the power cord and contact a qualified service technician or your retailer.
  - The power cord or plug is damaged.
  - Liquid has been spilled into the system.
  - The system does not function properly even if you follow the operating instructions.
  - The system was dropped or the cabinet is damaged.

Lithium-Ion Battery Warning

CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

NO DISASSEMBLY

The warranty does not apply to the products that have been disassembled by users.

WARNING
HAZARDOUS MOVING PARTS
KEEP FINGERS AND OTHER BODY PARTS AWAY

CHAPTER 1 INTRODUCTION

1.1 General Description

BYTEM, an ALL in ONE Panel PC, utilizes an Intel® Atom™ processor that provides high computing performance with low power consumption. It is available in 7-inch, 10.1-inch and 12.1-inch sizes.

The fanless BYTEM series operates silently and reliably in harsh environments. It comes with two SODIMM slots to accommodate up to 8GB of DDR3L 1333MHz system memory for 10.1-inch, 12.1-inch models and one 2.5" SATA HDD for data storage. It features two Gigabit Ethernet and one RS-232/422/485 port. (The 7-inch model supports two COM ports.) The unit is equipped with a front bezel that has IP65-rated protection.

The BYTEM series supports a wide-range 9V~30V DC power input for 10.1-inch and 12.1-inch models, using an 84W power adaptor, and 12V DC power input for 7-inch unit with a 60W power adaptor which makes it ideal for factory automation or any other industrial applications.

1.2 System Specification

1.2.1 Hardware Specifications

Model Name	BYTEM-W071-PC	BYTEM-101-PC	BYTEM-121-PC
System Mainboard	IB897		
CPU	Intel® Atom E3815 (Single-Core @ 1.46 GHz)	Intel® Atom E3845 (Quad-Core @ 1.91 GHz)	
Chipset	Integrated in Intel® Atom™ SoC		
Memory	2x DDR3L-1333 SO-DIMM, up to 4GB, Default 2GB(2GBx1) for BYTEM-W071-PC 2x DDR3L-1333 SO-DIMM, up to 8GB, Default 4GB(4GBx1) for BYTEM-101/121-PC		
I/O Interface	1 x USB 3.0 flag type blue color 1 x USB 2.0 Type A flag type 1 x D-SUB9 RS-232/422/485 COM1 1 x COM2 for BYTEM-W071-PC only 1 x DP port 2 x Gigabit LAN (RJ45) 1 x 3-pin DC power connector (1 x DC power jack for BYTEM-W071-PC) 1 x Power on/off switch, power on LED / HDD LED		
Storage	1 x 2.5” half-size SATA HDD with easy accessibility; Default 32G SSD for BYTEM-W071-PC 1 x 2.5” SATA HDD with easy accessibility; Default 32G SSD		
Expansion Slots	None		
Power Supply	12V DC input	9~30V wide range DC input	
LCD Size	7” TFT LCD	10.1” TFT LCD	12.1” TFT LCD
LCD Color	16.7M	262K	16.7M
LCD Resolution	1024 x 600	1280 x 800	1024 x 768
LCD Brightness	500	350	
LCD View Angle (H°/V°)	150/150	170/170	160/160
LCD Contrast	800:1		
Backlight MTBF	50,000 hrs	12,000 hrs	30,000 hrs
Touch Screen	Projected capacitive touch		
Construction	Aluminum front bezel and white steel back cover with aluminum heat-sink		
Mounting	Panel Mount VESA 50x50/75x75 mm	VESA 75X75 mm	
Dimensions (W)x(D)x(H) mm	211.5 x 143.5 x 52	285 x 204 x 59.6	317 x 255 x 59.6
Operating Temperature	-10°C~ 50°C	0°C~ 50°C(With SSD) / 0°C~ 40°C(with HDD)	
Storage Temperature	-30°C ~ 70°C	-20°C ~ 60°C	
Relative Humidity	10%~90% (non-condensing)		
Protection Class	IP65 front bezel		
Certification	CE/FCC Class B		
Operating System Support	Windows 8 32/64bit, Windows 7 Pro for Embedded 64bit, WES7 64bit

CHAPTER 2 MOTHERBOARD INTRODUCTION

2.1 Introduction

IB897 is a 3.5-inch single board computer based on the Intel® AtomTM E3800 series processor. It supports two DDR3L (1.35V) SODIMM sockets for a maximum memory capacity of 8GB.

IB897 features Intel's 7th generation (Gen 7) graphics engine and has both CRT and DisplayPort video display interface, as well as 24-bit LVDS dual channel interface with the use of the NXP PTN3460 device.

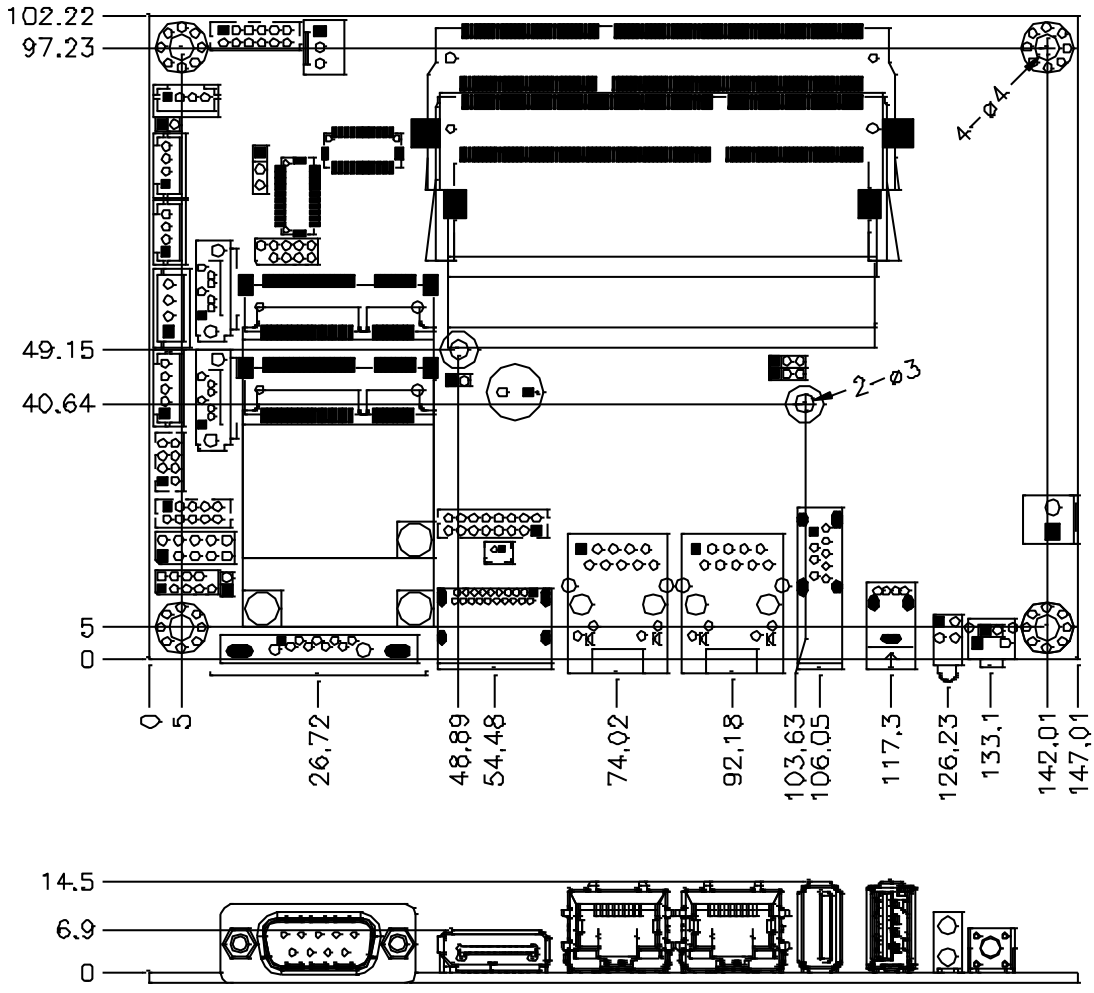
Onboard connectivity available includes two SATA II ports, two COM ports, one USB 3.0 port, four USB2.0 ports, audio, two Mini PCI-e(x1) slots, and Micro SD. Power input is provided by a +9~+30V DC in connector.

Product Name	**IB897**
Form Factor	3.5” disk size SBC
SoC Type/Speed	Intel® Atom™ QC E3845 /2MB cache/1.91GHz (IB897-I45&I45P) Intel® Atom™ DC E3827 /1MB cache/1.75 GHz (IB897-I27&I27P) Intel® Atom™ SC E3815 /512KB cache/1.46 GHz (IB897-I15& I15P) Package = FCBGA1170, 25mmx27mm, 22nm,Tj= -40 ° C to +110 ° C
BIOS	AMI BIOS
Memory	Intel® Atom™ SoC integrated memory controller Supports DDR3L (**1.35V only**), Non-ECC memory only 2 x DDR3 SO-DIMM socket [IB897-I45_P/IB897-I27_P], 8GB max. 1 x DDR3 SO-DIMM socket [IB897-I15_P], 4GB max.
VGA	Intel® Gen7 w/4 EUs graphics engines DisplayPort x 1 [Supports up to 2560x1200@60Hz] CRT x 1 via pin header [Supports up to 1920x1080@60Hz]
LVDS	24-bit dual channel via NXP PTN3460 thru eDP (Supports up to1920x1200 @ 60 Hz)
LAN	Intel® I210**I**T PCIe Gigabit LAN x 2
USB	Intel® Atom™ SoC built-in USB host controller Supports USB 2.0 x 4 ports; USB 3.0 x 1 port, extra USB 2.0 x4 ports (Thru SMSC HUB USB2514)

Serial ATA	Intel® Atom™ SoC built-in SATA II controller, supports 2 ports
Audio	Intel® Atom™ SoC built-in HD audio controller + Realtek ALC269QHD Codec w/ class-D speaker amplifier (2.3W per channel @ 5V power supply) [7mm x 7mm @ 48-QFN]; support 2-channel audio out + amp
LPC I/O	Nuvoton NCT5523D [64-pin LQFP, 7x7x1.4mm] - COM #1 (RS232/422/485) [EXAR SP339EER1 x 1 for jumper-less] - COM #2 (RS-232 only) [Hardware Monitor]: 2x thermal inputs; 2x voltage monitoring
Digital IO	4 in & 4 out
Expansion Slots	Mini PCI-e socket x**2** (1xFull-sized+1xHalf-sized,) **Full length MiniPCIe (1x) supports mSATA**
Edge Connector	DB9 for COM1, DisplayPort, RJ45 x 2 for LAN 1 & 2 USB 2.0 vertical connector x 1, USB 3.0 vertical connector x 1 LED indicators (red+green) x1 for power and HDD status & power button x 1(IB897-I45/I27/I15) 4-pin header for LED indicator & 2-pin header for power button via cable (IB897-I45P/I27P/I15P)
Onboard Header/ Connector	2x8 pin header for CRT; 2x4 pin header for 2x USB 2.0 DF20 socket connector x2 for 24-bit dual channel LVDS 4-pin box header for backlight/brightness control (PWM) 2x6 pin box header for Audio, 4-pin header for speaker 2x5 pin box header for COM2 2x5 pin headers for LPC (80-port card debugging purpose) Mini PCI-e(1x) connector x**2**, 5 pins box header for smart battery SATA connector x**2** for SATA device 4-pin power connector (JST type, for SATA device) 2-pin connector for power input, Micro SD slot (type 3.3V)
Watchdog	Yes (256 segments, 0, 1, 2…255 sec/min)
Power Connector	9V ~ 30V DC-in thru onboard 2-pin connector
Others	iSMART 2.0 [Auto-scheduler / Power resume]
OS Support	Windows 8.1 / Embedded; Windows 7 / Embedded, Linux
RoHS / REACH/ CE / FCC	Yes / Yes / Yes / Class B
Operating Temp.	-40 ˚ C to +85 ˚ C
Board Size	102mm x 147mm

Copyright © 2013 IBASE Technology Inc. All Rights Reserved.

Board Dimensions for [IB897-I45/I27/I15]



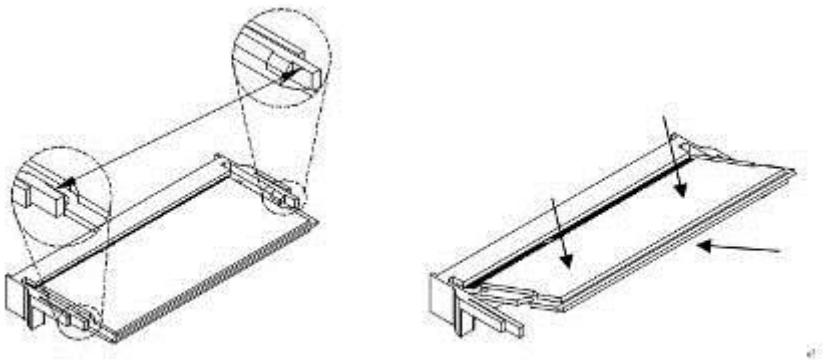
2.2 Installing the Memory

The IB897 board supports two DDR3L memory sockets for a maximum of 8GB.

Installing and Removing Memory Modules

To install the DDR3 modules, locate the memory slot on the board and perform the following steps:

1. Hold the DDR3 module so that the key of the DDR3 module aligned with that on the memory slot.
2. Gently push the DDR3 module in an upright position until the clips of the slot close to hold the DDR3 module in place when the DDR3 module touches the bottom of the slot.
3. To remove the DDR3 module, press the clips with both hands.



***** Channel-A slot must be installed with memory module for booting up*****

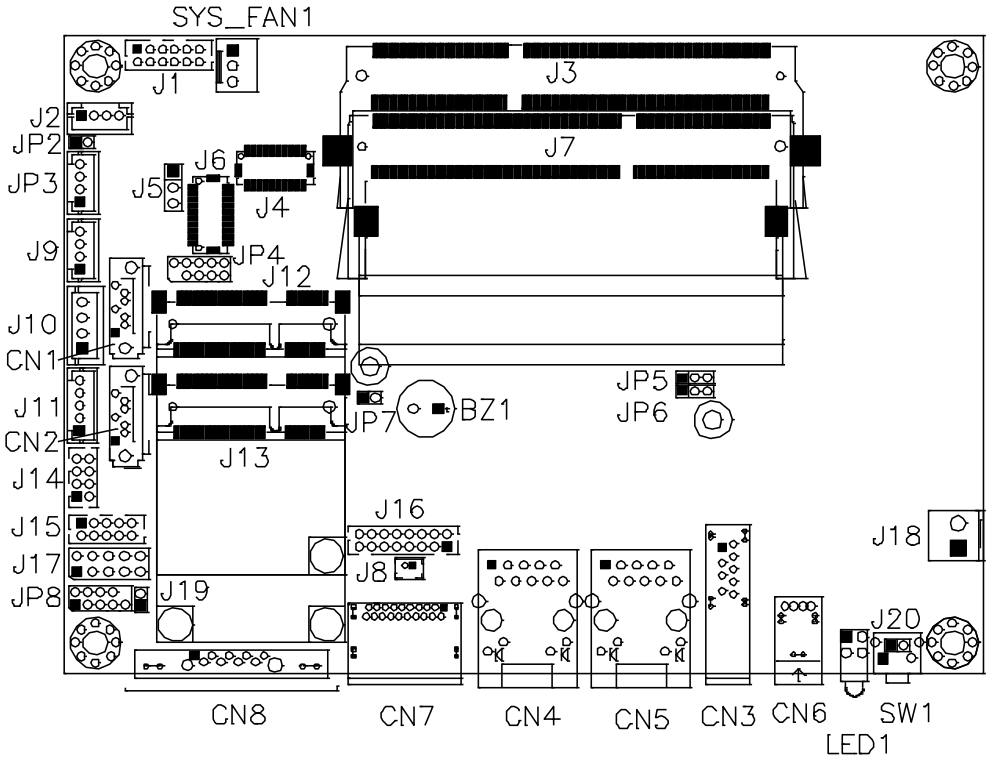
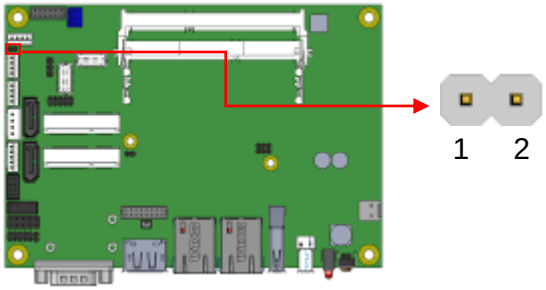
2.3 Setting Jumpers

Jumpers are used on IB897 to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following shows the jumpers/connectors on IB897.

Jumper Locations on IB897

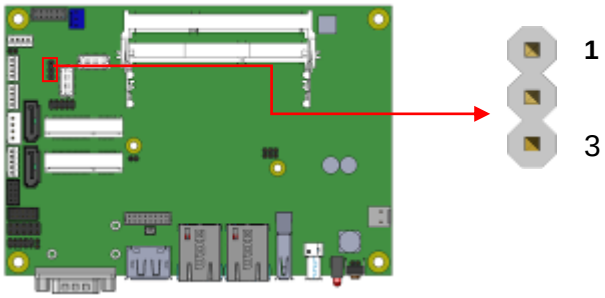


JP2: LVDS Panel Brightness Control Selection



JP2	Brightness Control (PWM mode)
Open	3.3V
Close	5V(Default)

J5: LVDS Panel Power Selection



J5	Setting	Panel Voltage
	Pin 1-2 Short/Closed	3.3V (default)
	Pin 2-3 Short/Closed	5V

CHAPTER 3 BIOS SETUP

3.1 BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

3.2 BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the <Del> key immediately allows you to enter the Setup utility. If you are a little bit late pressing the <Del> key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

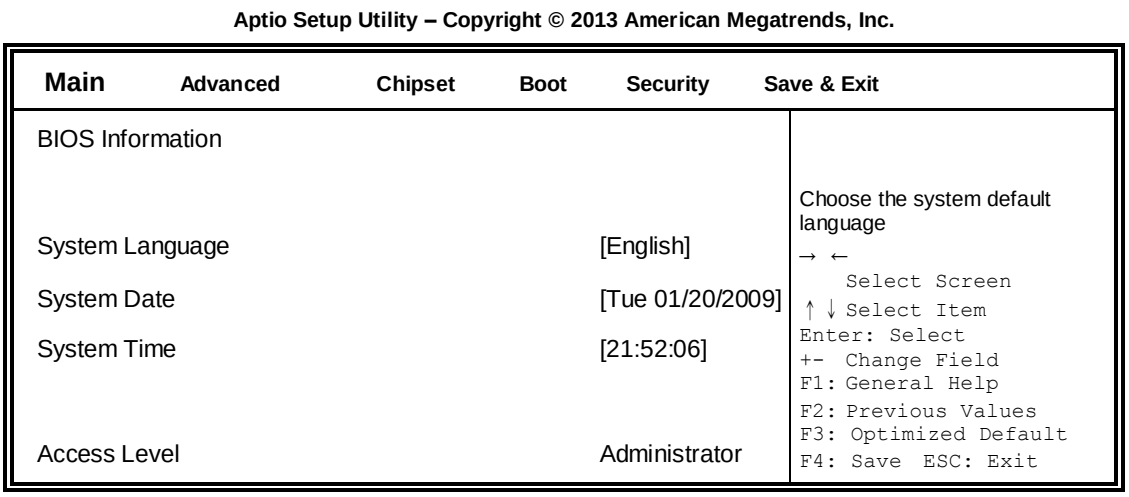
```
Press <DEL> to Enter Setup
```

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: *It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.*

3.3 Main Settings



System Language

Choose the system default language.

System Date

Set the Date. Use Tab to switch between Data elements.

System Time

Set the Time. Use Tab to switch between Data elements.

CHAPTER 4 DRIVERS INSTALLATION

IMPORTANT NOTE:

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

4.1 Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions.

1. Insert the DVD that comes with the system. Click ***System*** and then ***BYTEM-xx1/xx2/xx3 Series***

2. Click ***Intel(R) Chipset Software Installation Utility.***

3. When the Welcome screen to the Intel® Chipset Device Software appears, click ***Next*** to continue.

4. Click ***Yes*** to accept the software license agreement and proceed with the installation process.

5. The Setup process is now complete. Click ***Finish*** to restart the computer and for changes to take effect.

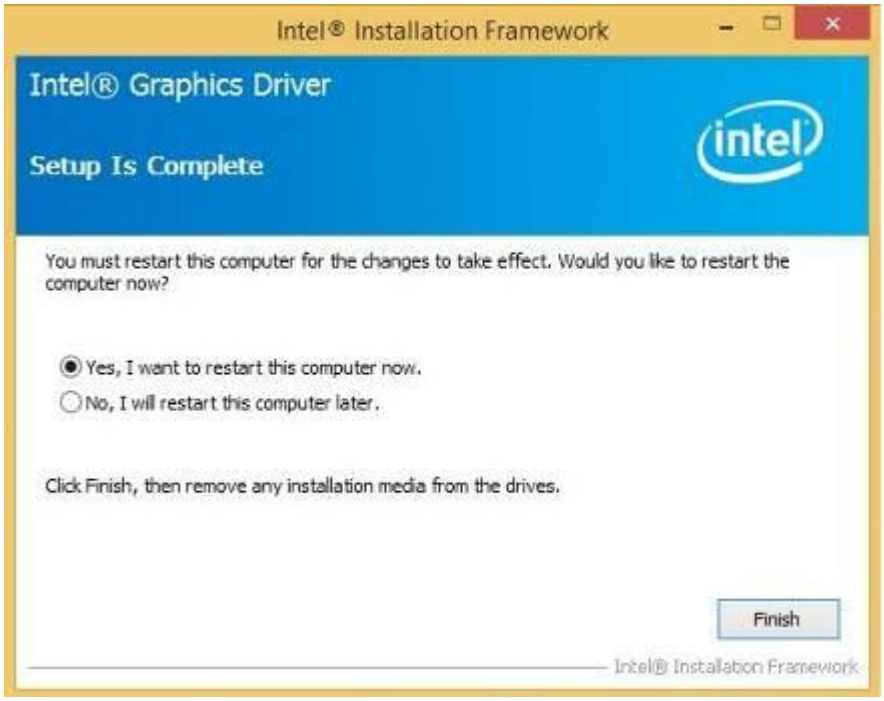
4.2 VGA Drivers Installation

1. Insert the DVD that comes with the system. Click ***Intel(R) Baytrail Chipset***. ***Driver***

2. When the Welcome screen appears, click ***Next*** to continue.

3. Click ***Yes*** to accept the license agreement and continue the installation.

4. Setup complete. Click ***Finish*** to restart the computer and for changes to take effect.

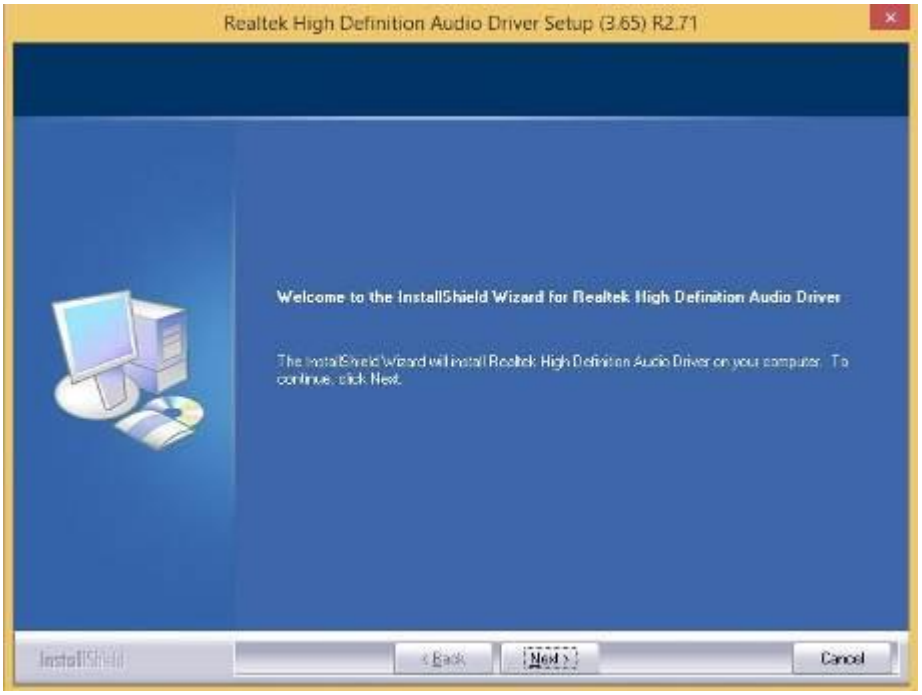


Copyright © 2013 IBASE Technology Inc. All Rights Reserved.

4.3 Realtek High Definition Audio Driver Installation

1. Insert the DVD that comes with the system. Click ***Intel*** and then ***Intel(R) Baytrail Chipset***. Click ***Realtek High Definition Audio Driver.***

2. On the Welcome screen, click ***Next*** to proceed with the installation.

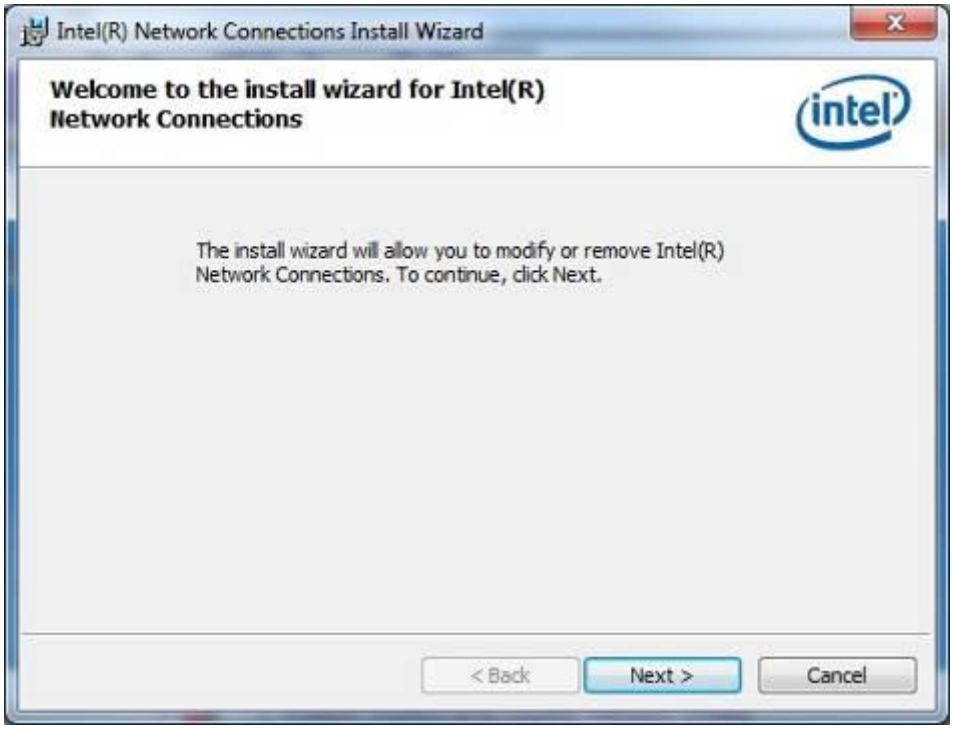


3. InstallShield Wizard is complete. Click ***Finish*** to restart the computer and for changes to take effect.

4.4 I21x Gigabit Network Drivers Installation

1. Insert the DVD that comes with the system. Click ***Intel(R) I21x Gigabit Network Driver.***

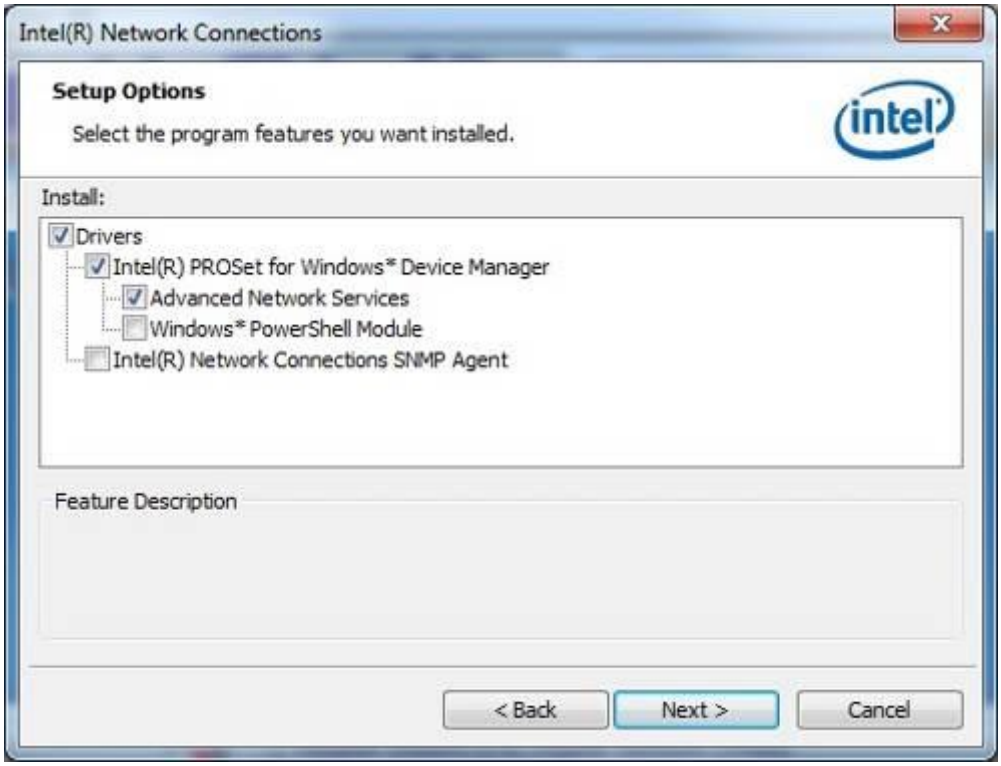
2. On the Welcome screen, click ***Next*** to proceed with the installation.



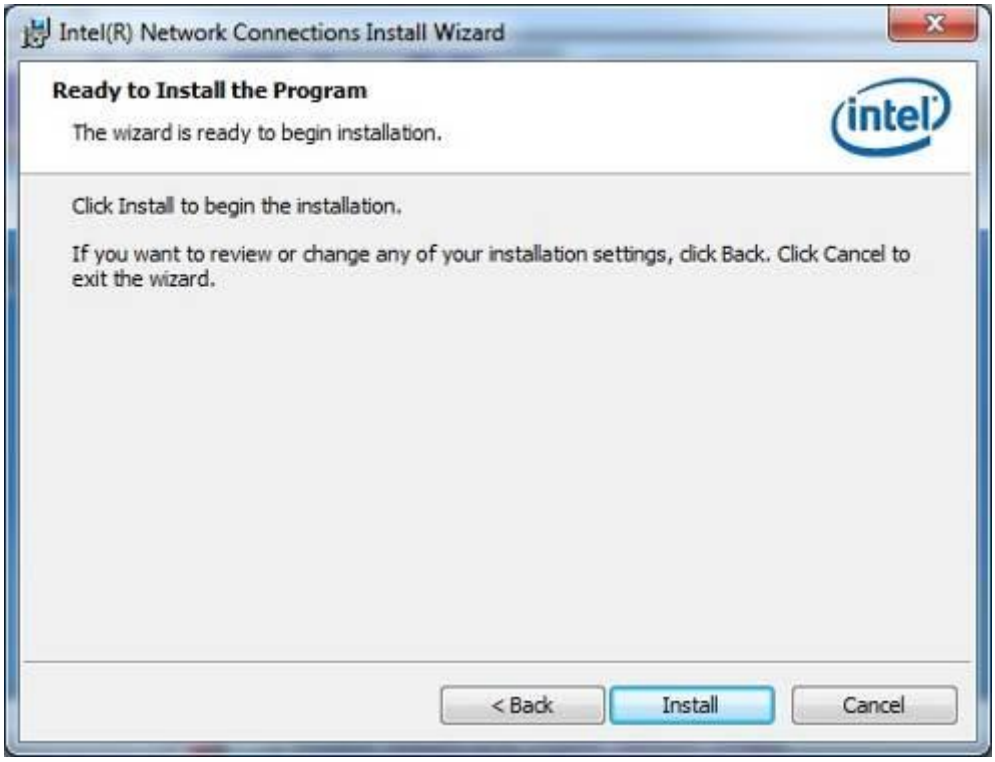
Copyright © 2013 IBASE Technology Inc. All Rights Reserved.

3. Click ***Next*** to accept the license agreement.

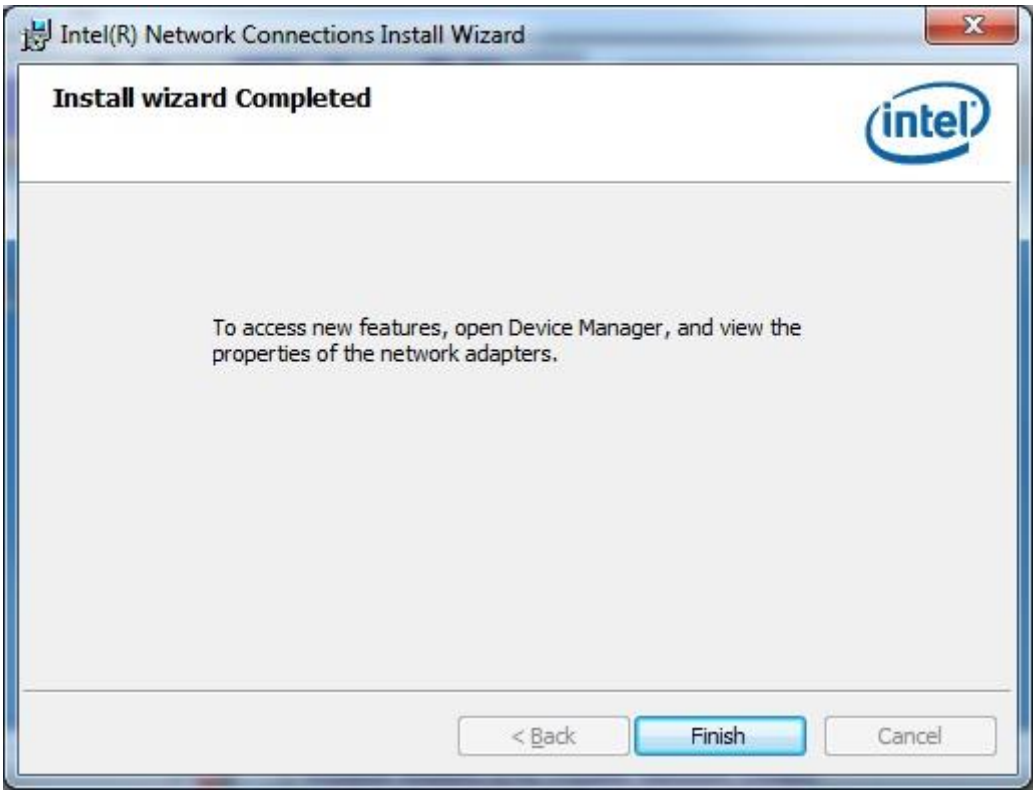
4. Click ***Next*** to accept the setup options.



5. Click ***Install*** ready to install the program.



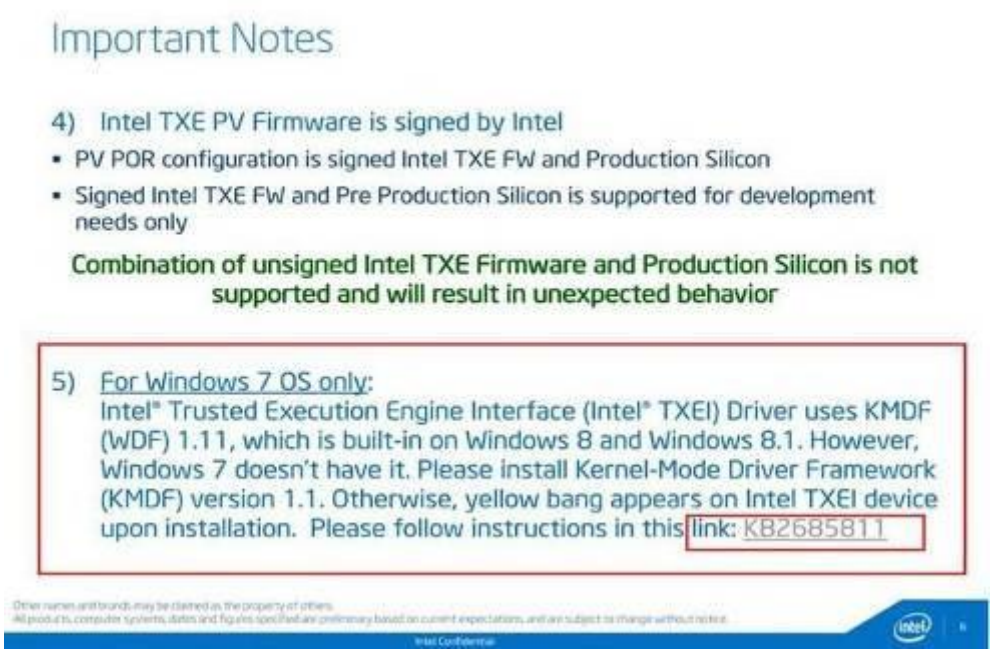
6. Install Wizard is complete. Click ***Finish*** to restart the computer and for changes to take effect.



Copyright © 2013 IBASE Technology Inc. All Rights Reserved.

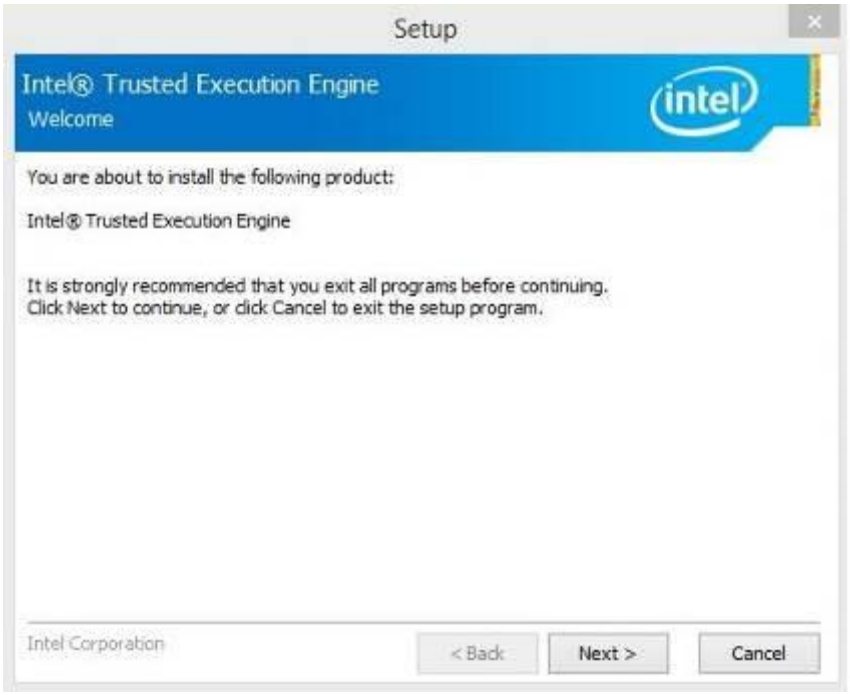
4.5 Intel Trusted Execution Engine Installation

Note :Windows 7 OS only



1. Insert the DVD that comes with the board. Click ***Intel(R) TXE Driver.***

2. On the Setup Welcome screen, click ***Next*** to proceed with the installation process.



3. Click ***Next*** to accept the license agreement.

4. Installation of the Intel Trusted Execution Engine is now complete. Click ***Finish***.

Copyright © 2013 IBASE Technology Inc. All Rights Reserved.

4.6 Intel USB 3.0 Drivers Installation

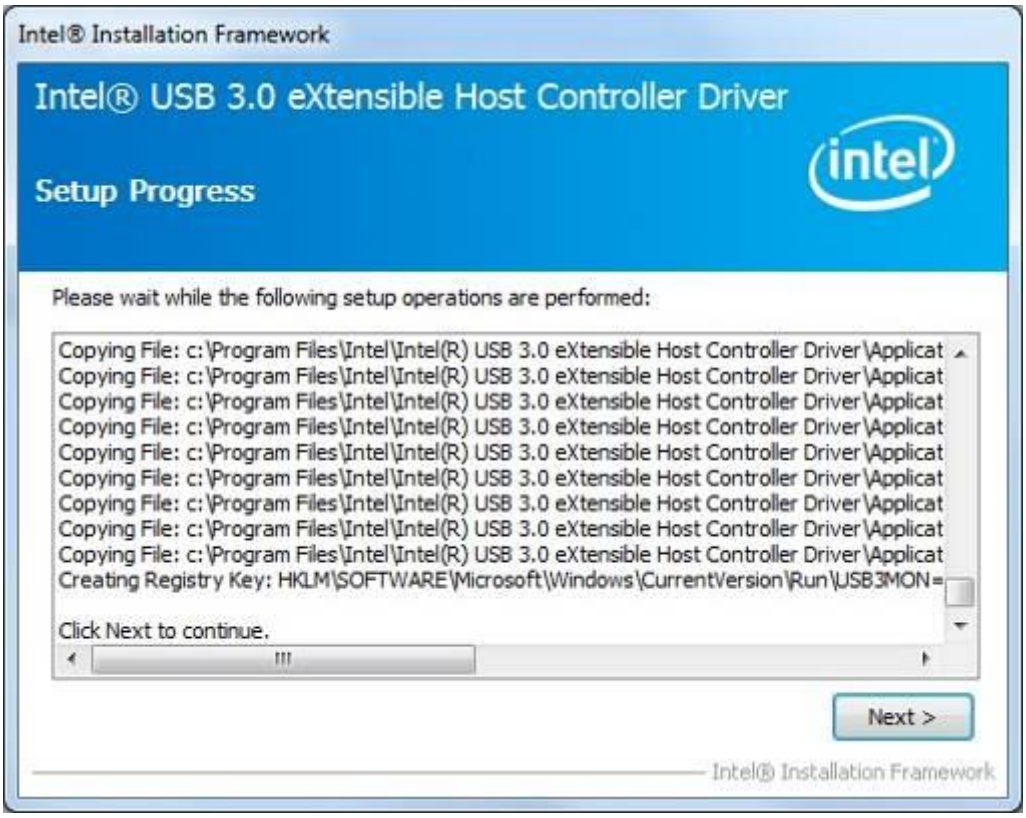
1. Insert the DVD that comes with the system. Click ***Intel(R) USB 3.0 Driver.***

2. On the Welcome screen, click ***Next*** to proceed.

3. Click ***Yes*** to accept the license agreement.

Copyright © 2013 IBASE Technology Inc. All Rights Reserved.

4. Click ***Next*** to accept the setup progress.



5. Setup is complete. Click ***Finish*** to restart the computer and for changes to take effect.

Appendix

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
0000h-001Fh	Direct memory access controller
0000h-001Fh	PCI bus
0040h-0043h	System timer
0050h-0053h	System timer
0070h-0077h	System CMOS/real time clock
0081h-0091h	Direct memory access controller
0093h-009Fh	Direct memory access controller
00C0h-00DFh	Direct memory access controller
00F0h-00F0h	Numeric data processor
02F8h-02FFh	Communications Port (COM2)
03B0h-03BBh	Intel(R) HD Graphics 4600
03C0h-03DFh	Intel(R) HD Graphics 4600
03F8h-03FFh	Communications Port (COM1)
0D00h-FFFFh	PCI bus
E000h-EFFFh	Intel(R) 8 Series/C220 Series PCI Express Root Port #7 - 8C1C
F000h-F03Fh	Intel(R) HD Graphics 4600
F040h-F05Fh	Intel(R) 8 Series/C220 Series SMBus Controller - 8C22
F060h-F07Fh	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0A0h-F0A3h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0B0h-F0B7h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0C0h-F0C3h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0D0h-F0D7h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0E0h-F0E7h	Intel(R) Active Management Technology - SOL (COM3)

Copyright © 2013 IBASE Technology Inc. All Rights Reserved.

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ0	System Timer
IRQ3	Serial Port #2
IRQ4	Serial Port #1
IRQ 10	Intel(R) 8 Series/C220 Series SMBus Controller - 8C22
IRQ 13	Numeric data processor
IRQ 16	High Definition Audio Controller
IRQ 16	Intel(R) 8 Series/C220 Series USB EHCI #2 - 8C2D
IRQ 16	Intel(R) Management Engine Interface
IRQ 19	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
IRQ 19	Intel(R) Active Management Technology - SOL (COM3)
IRQ 22	High Definition Audio Controller
IRQ 23	Intel(R) 8 Series/C220 Series USB EHCI #1 - 8C26

D. Watchdog Timer Configuration

The WDT is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, the user will restart the WDT at regular intervals before the timer counts to zero.
